

What Some of Our Clients Say ...

My billing was horribly tedious and very time consuming... when I outsourced my billing, I was able to give my headache away. I can track what's happening with each and every claim, online 24/7 at my convenience.

Asli Cakmak, MD
Banner Baywood Medical Center

In this day and age with all the complexities of medical billing, I can't imagine doing it any other way (billing in-house) at this point. A good Physician has to decide when to delegate responsibility.

Johnny Walker, MD
Walker Clinic of Health and Wellness

Medical billing is very difficult unless you outsource... to do it in the office would take a lot more time and money. It has allowed me to get better reimbursement on my claims because I have an entire billing company behind me to check claims and follow up on them. They have a wonderful online system that allows us to check on claims, update patient information and much more.

Donna Catanzaro, MD
Cape Physician Associates

Outsourcing my billing has allowed me to spend more time taking care of patients while not worrying about the headaches and the regulations that go along with it.

Kevin Theodorou, MD
Internal Medicine of the Valley

No doctor wants to deal with insurance companies or with patients who won't or can't pay. Outsourcing my billing takes me away from worrying about billing my patients and lets me concentrate on our main focus: practicing medicine.

Keyvan Koochek, MD
Ambulatory Internal Medicine
